1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to apparatus, classified in class 324, subclass 765.
 - II. Claims 14-31, drawn to apparatus, classified in class 324, subclass 765.
 - III. Claim 32, drawn to method, classified in class 324, subclass 765.

2. The inventions are distinct, each from the other because:

Inventions I and II as a first set and III as a second set are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that does not require at least one groove for receiving the semiconductor devices as mentioned in claim 1.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require means for transporting, means for removing the leadframe from the carrier or means for returning an unloaded carrier to the leadframe as mentioned in claim 14. The

subcombination has separate utility that does not require at least one groove in the leadframe support member for receiving the semiconductor devices as mentioned in claim 1.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A telephone call was made to the Office of the Attorney of Record on February 28, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
